

CEIC Committee Meeting
November 5, 2020

CEIC Concerns:

At the CEIC meeting, can you bring up if the school has considered adding a 4th play area for the playground to accommodate grade levels that have 4 classes? We do understand but a playground costs 60-100k. Some campuses only have one play area, so we are thankful we have two. There is also equipment you can check out for your classes. Ms. Bodle offered play ideas on additional places, basketball court, various games (around the world, horse) There is a 4 square area that can be utilized. There is also chalk for student use.

Is there a chance we could start a campus wide recycling program? We would love to, but we no longer have the green bin outside. The company that was offering this service- went out of business. Until we have a new company, we do not have an area to place recyclable materials.

To help with confusion, can we try not to rotate the pods students sit in as often as we are currently doing? Some classes are rotating pods weekly, it's difficult at lunch for students to remember their pods. CEIC committee agrees to ask teachers to keep pods the same for 3 week minimum. Also, please remember to bring clipboards to the cafeteria.

When we get 22 devices in each room how will we charge them? Cart? Talk with your team and brainstorm about this. Carts are around 1500 each. I pads charging devices are easier, but with Chromebooks- what can we utilize? Wall shelf? Looking for ideas for items that don't take up a ton of square footage.

Campus Improvement Plan:

We reviewed all 6 goals and 73 strategies. We looked at each strategy and discussed how far we feel like we have come with it this year. Mrs. Foster will then take the percentages and apply them to the Campus Improvement Plan.
