### Virtual Learning

- Everyone is very excited and ready. As of today, we only have a small number of students that have applied to remain online.
- Still waiting on student laptops. The hope is the devices will be here before Christmas. There is a plan already in place for distribution.

### COVID Protocols

- Need to be sanitizing all devices used and tables every time they are used.
- Trash cans haven't been emptied and are getting full. Tie up the trash bag, put it in the hallway. Custodians will pick them up.
- Computer cleaning- spray alcohol on a paper towel and wipe down.

### Safety and Security

- Harris meeting with Josh Oliver tomorrow over concerns- parking lot, passing periods, lunch, and dismissal. If you have an issue, call the front office if help is needed because they have a radio and can track down AP or counselors that are needed.
- Roamers are an issue during the 3rd block.
- If you have a room next to the stairs, please stand by the stairs instead of your classroom doors to direct traffic according to the direction for those stairs.
- Students being picked up in all sorts of places. Security is monitoring and shutting it down and forcing proper pick up protocol.
- Political tension amongst our students has started and even more so with the upcoming election. Please stop any heated discussions that may start. With free speech comes responsibility and respect. We must teach and remind our students of this. Security will be on high alert leading up to the election and days following.
- As students come back, make sure we enforce COVID protocol.
- All confirmed cases at WHS were contracted from either a parent that brought it home from work, or they went to a college town.

### Assessments and Data

- Drives a lot of decisions
- We are lacking data
- MAPS testing only affects Math and English
- Going to roll out some more 6WPM- have one at the end of the semester
- Tested subjects only for interim assessments

- Data will be used to drive what direction we go next year,
- SpEd is one area that we will focus on. This is an area we did not do well on. Be thinking how we can improve in this area. Harris has a plan we will discuss. Professional development possible on how to accommodate based on IEP's

### Failures

- SpEd is our largest failure group
- Going to roll out night school. Will focus on the core, LOTE. Not sure about CTE because the students have to meet a seat time requirement.
- Not many students took care of the 1st 6 weeks recovery opportunity.
- Does not matter how we feel about the situation, we as a school still have to answer for the failing student.
- Non-negotiable on students not coming back. Seniors- if they don't come back, there is a team to go find them.
- The students that have come back are doing better for the most part.

### Discipline

- We have been identified as a campus in need of improvement in the area of the discipline as it relates to special populations. We are working to develop alternative discipline strategies before sending students to ISS or DAEP.

### Be looking for:

- Push out of 21-22 calendar recommendations from Lisa Mott. If you have recommendations or would like to create a calendar, instructions on how to do this will be from Mott.

### Questions/Concerns

- Can we move announcements to the very end of TRIBE to not disturb testing.  
**DONE**
- Pacing is about 3 weeks behind. Start pulling out the things that are not relevant. Need to focus on the meat so we can catch up.
- Pacing- moving forward, teachers need to be consulted on what realistic pacing is in each chapter. Curriculum coaches need to be present so they can hear the teachers.
- Vertical alignment for courses- meeting is coming to discuss and better do this. Would like to physically meet with the teachers at the junior high so we can work as a team.
- Oct. 30th- Call failures, work in your rooms, then leave for the homecoming parade. If we contact our failures in advance are we required to be on campus? YES, everyone must work a half-day, contacting parents and planning. We hear

elementary teachers are not required to be on campus if their conferences are completed earlier in the week.

- Can the half day before Christmas Break- be a day without students? What are the plans for that day?
- Testing center is still happening for who is left online.
- No finals all year. Use those days to catch up on instruction.
- FASFA Nights?
